Welcome Message from the Chair, Organising Committee, Options X

Welcome to Singapore and to the 10th Edition of Options for the Control of Influenza (Options X) 2019.

Options is the premier global meeting on influenza that brings together researchers, clinicians, policy makers, and public health practitioners to address the impact of influenza. As we all know, seasonal influenza results in substantial burden of disease and mortality, while the threat posed by pandemic influenza looms large.

Despite the awareness of this threat and the years of research on influenza-related topics, substantial gaps still remain in our understanding of influenza disease burden and epidemiology, its host-pathogen interactions, how to rapidly diagnose it in the field, optimal clinical management, the development of a universal vaccine, and pandemic preparedness and response, among other issues. Many of these issues have been highlighted in various global influenza research agenda.

This five-day meeting, organised by the International Society of Influenza and other Respiratory Viruses, aim to address these research and knowledge gaps through the sharing of recent advances in virology and pathogenesis, clinical sciences, diagnostics, vaccines, public health, and understanding of co-infections with other respiratory pathogens. For the first time, we are also introducing a policy makers' track to provide easy-to-understand summaries of key issues for decision making and to accelerate translation of research into policy; and a Chinese research session devoted to the latest research from China.

Options X provides the unique opportunity for like-minded individuals to network and to explore future collaborations. I wish to thank the Organising Committee, the Scientific Committee, and the sponsors for giving their time and resources to make Options X a success. I hope that through our collective efforts we can effectively combat influenza, and I wish you a successful conference.

I also hope that all of you will have sufficient time to explore this vibrant city, which has much to offer first time and repeat visitors. We hope that you will enjoy the uniquely Singaporean hospitality and experience!

Vernon Lee Chair of the Organising Committee Options X

Welcome Message from the Chair, ISIRV

It is an honour to welcome you to the 10th Edition of Options for the Control of Influenza (Options X) 2019, which builds on the success of previous meetings in the Options series. It is the International Society for Influenza and other Respiratory Virus Diseases' (ISIRV) premier event and remains the largest international conference exclusively dedicated to influenza prevention, control and treatment, including seasonal influenza and pandemic preparedness. The conference brings together academic scientists, researchers, healthcare professionals and public health specialists to share their experiences and research results on all aspects of influenza.

It also provides an interdisciplinary platform with global reach, for the discussion of the most recent innovations, advances and concerns. ISIRV is very focused on fostering the exchange of scientific knowledge and practice and has introduced a Chinese focused stream. It is hoped that science policy focus of this stream, dedicated to public health officials will address the pressing issues in the wider Asian region.

At this Conference, ISIRV recognises its membership in several ways; firstly, by bestowing prestigious awards, "the ISIRV Lifetime Achievement Award" recognising the long and productive career of a member in the field of respiratory infectious diseases and their service to isirv, and providing the "Geoffrey Schild Travel Award" to an imminent Plenary Speaker. And secondly, by supporting promising young scientists and scientists from poor resourced countries, by providing 38 travel and accommodation grants.

On behalf of ISIRV, I would like to thank everyone who has contributed to the preparation of this conference, with special thanks to the Conference Chairs, A/Prof Vernon Lee and his Organising Committee; and Prof Paul Tambyah and his Scientific Committee. The Committees have developed an exciting scientific program which will cover all aspects of influenza, the disease, its treatment and control. Finally, I wish to acknowledge our sponsoring partners for their support of this internationally important conference.

Lance C Jennings Chair, ISIRV

Welcome Message from the Scientific Committee Chair, Options X

Dear all,

On behalf of the scientific committee, it gives me great pleasure to welcome you to OPTIONS X in Singapore. I would first like to begin by thanking the track chairs and all the reviewers, moderators, presenters and submitters who have contributed to making this yet again, the leading scientific meeting on influenza globally. The track chairs in particular have done a stellar job in planning the program, reviewing abstracts, judging for the awards and overall making the scientific content of this meeting second to none.

As you all know, influenza remains at the forefront of global public health with fears of another deadly pandemic of a novel strain of influenza keeping policy makers, public health professionals, scientists and clinicians on our toes constantly. Fortunately, thanks to the work of many of the people at this conference, influenza is one of the few respiratory viral infections with licensed therapeutics available as well as a wide range of vaccine choices. At the same time, while there are concerns about the emergence of resistance to antivirals there is renewed hope that a universal influenza vaccine may become a reality sooner rather than later. Rapid advances are also being made in the fields of virology, pathogenesis and public health.

The International Society for Influenza and other Respiratory Viruses (ISIRV) is the leading scientific society in the field and Singapore is proud to be the first Southeast Asian host for the OPTIONS meeting. While East and Southeast Asia have been viewed as the epicenters for future influenza pandemics, the region is also the focus of a growing scientific community eager to contribute to global public health and the advancement of the science.

We do hope that you get some time either before or after the conference to enjoy the sights, sounds and perhaps most famously the tastes of Singapore, a truly unique experience.

Paul Ananth Tambyah Chair of Scientific Committee Options X

SCHEDULE AT A GLANCE

WEDNESDAY I 28 A	UGUST 2019	
9:00am – 1:00pm	Special Session : Latest Research from China	Room 331
3:00pm – 3:45pm	Official Opening Ceremony	Hall 406CX
3:02pm – 3:07pm	Welcome Address from the Chair, Options X	
3:07pm – 3:13pm	Welcome Address from the Chair, ISIRV	
3:13pm – 3:25pm	Opening Address by Guest-of-Honour	
3:35pm – 3:45pm	Award Presentation	
3:45pm – 4:15pm	Tea Break	Exhibition Hall 405EX

High-speed high-density dedicated Conference WiFi is available throughout the Convention Centre.

INTERNET SSID : Options X SSID Password : OptionsX2019

MOBILE APPLICATION

Options X has designed a mobile application that includes all programme information and abstracts. Easily access sessions, speakers, exhibitors and organiser messages.

How to Download

iOS App Store

- 1. On your device, open the App Store app
- 2. Search for Options X 2019 App
- 3. Download and Open
- 4. To login, key in the following User ID : "your email address" as registered for the conference. Login password : OptionsX2019
- 5. Then "click" on the green arrow on right bottom
- corner of your mobile phone
- 6. Click on the "save" button.

Android Google Play

- 1. On your device, open the Google Play
- Search for Options X 2019 App
- 3. Download and Open
- 4. To login, key in the following User ID : "your email address" as registered for the conference.
- Login password : OptionsX2019 5. Then "click" on the green arrow on right bottom
- corner of your mobile phone
- 6. Click on the "save" button.

MOBILE PHONES

Delegates are requested to turn their mobile phones or devices to silent when entering sessions.

SOCIAL MEDIA

Join the conversation using the hashtag **#OptionsX19.** You can simultaneously post to both social media and Mobile App. Link your account in the settings on the Mobile App and then click on the social media item icon.

CERTIFICATE OF ATTENDANCE

After event, you will receive an email with a link to an online evaluation form (please check your junk box if you do not receive it). Once you have submitted the form, you will receive your certificate of attendance.

CME ACCREDITATION

The Options X is recognised by the Singapore Medical Council as a Continuing Medical Education programme (CME). All fully and conditionally registered Doctors in Singapore can sign up for their CME Points.

To sign-up for CME points on each day of participation, you are required to manually sign in and out at the Bag Collection Counter as follows:

- Morning Session
 - : By 12:30pm Afternoon Session
 - : By 5:00pm

PHOTOGRAPHY

Please be aware that a photographer has been commissioned by the ISIRV to take photographs at this event.

These photographs may be included in the ISIRV's educational, promotional, corporate publications and on its website. They may also be circulated in the media and made available to interested parties.

If you do not wish to be included in any shots or footage, please advise the photographer.

ACCOMMODATION

If you have any queries with your accommodation (booked through Conference Secretariat & Housing Bureau), kindly proceed to the Exhibition Management Counter located outside the Exhibition Hall 405EX.

EMERGENCY NUMBERS

No	Organisation	Contact Number
1	Police	999 (toll-free)
2	Ambulance & Fire Brigade	995 (toll-free)
3	ER Ambulance	+65 6222 2995
4	Non-Emergency Ambulance	1777
5	Civic Ambulance	+65 6333 3000
6	STB Tourist Line (24-hr automated tourist information system)	1800 7360 2600 (toll-free in Singapore only)

GST/TAX REFUNDS ON DEPARTURE

As a tourist in Singapore, if you make any purchase of more than SGD 100 (including GST) at participating shops, you may claim a refund on the 7% Goods and Services Tax (GST) paid on your purchases.

You are entitled up to 3 same-day receipts/invoices from shops bearing the same GST registration number to meet this minimum purchase amount of SGD 100. To know whether a shop is participating in the Tourist Refund Scheme (TRS), look for a "Tax Free" shopping logo or sign displayed at the shop. You can also check with the retailer whether your purchases are eligible for GST refund.

INDEMNITY/INSURANCE

The Conference Organisers have taken reasonable care in making arrangements for the Conference, Exhibition, and Social Programme. Neither the Organising Body, the Local Core Organising Committee, the Conference Management Company, nor its sponsors or committee members assume any responsibility, contractual or delictual for any loss, injury or damage to persons or belongings, or additional expenses incurred as a result of delays or changes in air, rail, sea, road or other services, strikes, sicknesses, weather, or for any acts or omissions by any persons, or for any unforeseen changes to the programme including cancellation of the Conference due to force majeure or any related events or activities. All participants are accordingly advised to make their own arrangements for adequate insurance cover including personal health and travel insurance.

LANGUAGE

The official language of the Conference is English. There will be no simultaneous interpretation.

ABOUT SINGAPORE

From a humble fishing village, Singapore has grown to become a prosperous cosmopolitan nation with four major races, namely Chinese, Malay, Indian and Eurasian. With abundant greenery and world-class attractions like the beautiful Botanical Gardens, the futuristic Gardens by the Bay and the Jewel Changi Airport, Singapore truly is a Garden City. Yet it is our distinct historical neighbourhoods that make Singapore a unique destination, where you can enjoy discovering our cultural, religious and culinary diversity, all within a stone's throw of the city centre.

Conference Location: Suntec Singapore

Only 20 minutes from Changi International Airport, Suntec Singapore is conveniently located in the Central Business District and just minutes from the city's entertainment and cultural attractions and the Marina Bay area. Suntec Singapore offers direct access to more than 5,200 hotel rooms, 1,000 retail outlets, 300 restaurants, 6 museums and Esplanade - Theatres on the Bay and more.

- Bugis Junction (1.1km)
- Bugis Street Market (1.1 km)
- Marina Bay Link Mall (1.9km)
- Marina Square (0.5km)
- Millenia Walk (0.3 km)
- Raffles City (0.6km)
- Shoppes at Marina Bay Sands (1.3km)
- Suntec City Mall (0.2 km)

Recreation

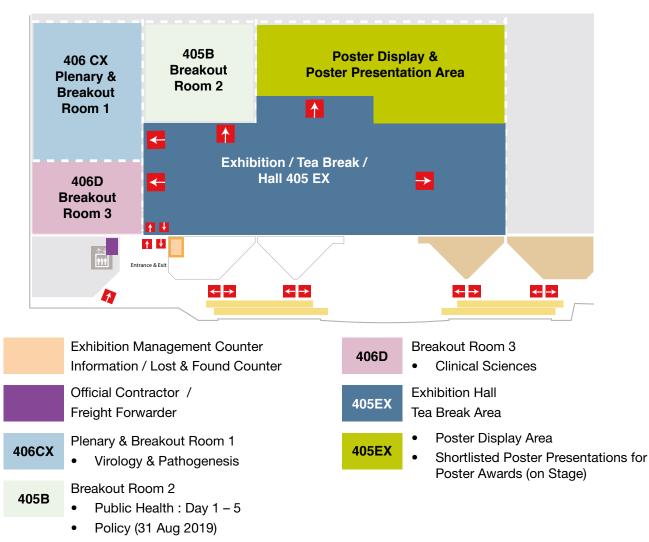

- Esplanade Theatres on the Bay (0.5km)
- Gardens by the Bay (1.3 km)
- Marina Bay Sands Hotel (1.6 km)
- Marina Bay Light Shows (1.6km)
- Scooters and Explore
- Ride the Singapore Flyer (1km)
- Stroll the City by Night
- The Merlion of Singapore (1km)
- Walk the Helix Bridge (1 km)
- · Watch the Sunset Over The City

SUNTEC FLOORPLAN

LEVEL 4

SCIENTIFIC COMMUNICATIONS

SPEAKERS' PREVIEW ROOM Room 335, Level 3

Registration of Speakers and Chairpersons will be at the Speakers' Preview Room.

Speakers and Oral Presenters:

- Please proceed to the speakers' Preview Room to collect your Conference pass the day prior to your scheduled presentation.
- Please ensure that all amendments are completed in the speakers' preview room at least 4-hours before the start of your session.
- If you are giving a video only presentations (as specified on the programme), please bring a link with you to download the video.
- Changes to your slides can be done in the Speakers' Preview Room, at the following timings:

Operating Hours:

Day	Date	Time	
Tuesday	27 August 2019	3:00pm – 7:00pm	
Wednesday	28 August 2019	8:00am – 8:00pm	
Thursday	29 August 2019	7:00am – 8:00pm	
Friday - Saturday	30 – 31 August 2019	7:00am – 6:00pm	
Sunday	1 Sept 2019	7:00am – 3:00pm	

- Please note that all rooms are fitted with computer projection facilities only. No overhead projector facilities are available.
- Speakers should report to the room of their presentation at least 20 minutes before the start of the session to meet the session chairpersons, and familiarise themselves with the audio-visual equipment and venue layout.
- A preview monitor will be provided and placed on the floor in front of the stage. A wireless remote laser pointer and slide progressor that will enable you to either advance or return to your previous slide(s). The forward and return keys will be clearly indicated on the remote.
- No PPT foot notes will be visible during your presentation from the preview monitor.
- Speakers are required to strictly adhere to the allocated presentation time allowance.
- PLEASE NOTE: Session chairs will be instructed to stop your presentation when you exceed your allocated time.
- All speakers must declare their interests in the second slide of their presentation.
- If you have no declarations of interest, please state 'declaration of interests – none'.

The following audio-visual equipment will be provided for the presentations: microphones, laser pointers, LCD projectors, Laptop (Notebook loaded with Window10 / Microsoft Office 2016 or equivalent).

Software Application: Adobe Reader, QuickTime, Media Player, Flash Player, VLC Player

Session Chairpersons

- Proceed to the Speakers' Preview Room to collect the bios of the presenting speakers in your session at least 1 hour before the start of your session.
- Be at the venue of your session at least 20 minutes before the session starting time. The room manager will introduce the presenting speakers to you.

Oral and/or Poster Presentation Judges

- Proceed to the Speakers' Preview Room to collect the scoring sheets at least 30 mins before the start of your session.
- Report to the venue of your session at least 20 minutes before the start of the session to meet the session chairpersons.

Format & Audio-Visual Information

- All PowerPoint presentations or videos must be in the 16:9 ratio format.
- If you have embedded videos in your presentation please also bring them separately so that if there is a problem, the technician in the speakers' preview room can assist with this.
- If you have prepared your presentation on a Mac, please allow a bit of extra time to make sure it runs correctly on the conference systems. In some cases you may be required to use your own Mac and should carry your converter cables and adaptors with you for this purpose.

ORAL PRESENTATION

Each presenter is allowed a maximum of 10 minutes for oral presentation followed by 2 minutes for questions & answers. All presenters should familiarise themselves with the date, time and venue of their sessions, and arrive at the correct venue at least 20 minutes before the start of the session.

Please refer to Pages 42 to 50 for details.

POSTER DISPLAY

Posters will be put on display at the Exhibition Hall 405EX. Each poster board will be individually marked with the Abstract ID number. A full directory of the Abstract ID Numbers will also be displayed at the Poster Area. Mounting supplies will be provided at the poster area.

Wednesday, 28 August 2019 :

Poster Session 1 – Clinical Sciences & Co-Infection

6:30pm – 8:00pm

Setup : Day of Display, 28 August 2019 from 8:00am - 10:00am

Teardown : Day after Display, 29 August 2019 from 4:00pm - 5:30pm

SCIENTIFIC COMMUNICATIONS

Friday, 30 August 2019 :

Poster Session 2 – Virology & Pathogenesis

Time	: 6:00pm – 7:30pm
Setup	: Eve of Poster Display, 29 August 2019, from 6:00pm – 7:30pm
Teardown	: Day of Poster Display from 7:45pm – 8:45pm or

Next morning, 31 August 2019, from 7:15am – 8:15am

Saturday, 31 August 2019 : Poster Session 3 – Public Health

Time : 5:30pm – 7:00pm

Setup : Day of Display from 8:30am - 10:00am

Teardown : Evening of Display from 7:45pm - 8:45pm

Please refer to pages 54 to 79 for details

All posters not taken down at the stipulated dates and times will be taken down and disposed off. The Conference Management Company will not be responsible for any misplaced or lost posters

SHORTLISTED POSTER PRESENTATIONS FOR POSTER AWARDS

Poster Presentations will be held on the stage located at the Exhibition Hall 405EX.

In addition to putting up your posters based on the schedules stated above (Poster Display), poster presenters will also be required to do the following:

- Each presenter needs to bring either a powerpoint version of the poster or powerpoint slides (maximum of 4 slides) for the presentation.
- All presenters should familiarise themselves with the date, time and venue of their sessions, and arrive at the correct venue at least 20 minutes before the start of the session

Schedule for Poster Presentation:

Wednesday, 28 August 2019 : Clinical Sciences & Co-Infection

Time : 6:30pm – 8:00pm Each presenter will be given a total of 5 mins (3 mins for presentation and 2 mins for Q&A).

- Friday, 30 August 2019 : Virology & Pathogenesis Time : 6:10pm – 7:30pm Each presenter will be given a total of 5 mins (3 mins for presentation and 2 mins for Q&A)
- Saturday, 31 August 2019 : Public Health Time : 5:30pm – 7:00pm Each presenter will be given a total of 3 mins of presentation

Order of presentations : refer to Page 51 to 53 for details.

PICK UP YOUR COPY OF THE REPORT AT BOOTH B1

A group of **internationally recognized**, **cross-disciplinary experts** developed a set of "big ideas" to ignite a movement toward successful development of a universal influenza vaccine (UIV).

The report provides **bold**, **actionable recommendations** designed to spur momentum toward transformative breakthroughs and overcome obstacles in research and development, policy and industry.

Day 1: 28/8/2019 Wednesday

	Options X for the Control of Influenza PROGRAMME	12
Day 1: 2	28/8/2019 Wednesday	
	Latest Research from China / Level 3, Room 331 / Session Chair: John Tam /The Hong Kong Polytechnic University, Hong Kong/	
09.00am	Opening Remarks Liang Xiao Feng /Chinese Preventive Medicine Association ,China/	
09.15am	Part 1: Animal and Zoonotic Influenza in China The Avian Influenza Control in China Chengjun Li /Chinese Academy of Agricultural Sciences ,China/	
	Human Infections with Zoonotic Influenza Virus in China Dayan Wang /Chinese National Influenza Center,China/	
	Human Infections with Novel Influenza Viruses and Pandemic Preparedness in China Lei Zhou /Chinese Center for Disease Control and Prevention ,China/	
	Seasonal Influenza Vaccine Policy Development and Implementation in China Luzhao Feng /Chinese Center for Disease Control and Prevention ,China/	
11.15am	Tea Break / Level 3, Room 331 /	
11.30am	Part 2: Pharmaceutical Research in China (with a Focus on Chinese Medicine)	
- 1.00pm	Adjuvant Use of Traditional Chinese Medicine in Influenza and Pneumonia Bin Cao /China-Japan Friendship Hospital, China/	
	Repress Antiviral Genes STAT1/2 in Avian Influenza Infection Chengyu Jiang /Peking Union Medical College,China/	
	Prediction of Zoonotic Influenza Virus Transmission and Clinical Severity Using Biomarkers Yuelong Shu /Sun Yat-sen University, China/	
	Official Opening Ceremony / Level 4, Hall 406CX /	
3.00pm	Vernon Lee /Chair, Options X/ Lance Jennings /Chair, ISIRV/ Lam Pin Min /Senior Minister of State, Ministry of Health and Ministry of Transport, Singapore/	
	Presentation of ISIRV Awards	
	ISIRV Lifetime Achievement Award: Frederick Hayden /University of Virginia School of Medicine, USA/	
	Geoffrey Schild Lecture: Barney Graham /National Institute of Allergy and Infectious Disease, USA/	
	ISIRV Wiley Young Investigator Award: Khristine Joy Antigua /Chungbuk National University, Republic of Korea/	
3.45pm	Tea Break / Exhibition Hall 405EX /	
	Opening Keynote / Level 4, Hall 406CX / Session Chair: Vernon Lee /Ministry of Health, Singapore/	
4.15pm	Pandemic and Seasonal Influenza: The Known Unknowns Malik Peiris /University of Hong Kong, Hong Kong/	
	A Bird's Eye View of Influenza Research Kanta Subbarao /Peter Doherty Institute for Infection and Immunity, Australia/	
	The Geoffrey Schild Lecture: Design Options for Universal Influenza Vaccines Barney Graham /National Institute of Allergy and Infectious Disease, USA/	
6.00pm	Opening Reception / Dinner / Exhibition Hall 405EX /	
6.30pm -8.00pm	Clinical Sciences and Co-Infection Poster Session + Poster Reception / Exhibition Hall 405EX /	
6.30pm -8.00pm	Shortlisted Poster Presentations for Poster Awards / Exhibition Hall 405EX /	

Day 2: 29/8/2019 Thursday

	Plenary Talks: Vaccines / Level 4, Hall 406CX / Session Chair: Mark Tompkins /University of Georgia, USA/
8.30am	Challenges in Influenza Prevention and Control Dan Jernigan /Centers for Disease Control and Prevention (CDC), USA/
	Global Coordination Activities on Universal Vaccines and Priorities Martin Friede /World Health Organisation, Switzerland/

10.00am

Tea Break / Exhibition Hall 405EX /

Day 2: 29/8/2019 Thursday

	Session 1					
/ Level 4, Hall 406CX /		/ Level 4, Hall 406D /		/ Level 4, Hall 405B /		
Virology & Pathogenesis			Clinical Sciences	Public Health		
/Centers fc			Clinical (I) Session Chairs: Zambon /Public Health England, UK/ Fisher /National University Hospital, Singapore/	Vaccine Efficacy/Effectiveness (I) Session Chairs: Sheena Sullivan /WHO Collaborating Centre for Reference and Research on Influenza, Australia Esther Kissling /Epiconcept, France/		
10.30am	Influenza Transmission in Experimental and Field Settings Hui-Ling Yen /University of Hong Kong, Hong Kong/	10.30am	Rapid Molecular Point of Care Tests: Strategies for Use Maria Zambon /Public Health England, UK/	10.30am	Do Influenza Vaccines Attenuate the Severity of Breakthrough Infections? Mark Thompson /Centers for Disease Control and Prevention, USA/	
10.50am	Pathogenesis and Transmission of Emerging Influenza Viruses Sander Herfst /Erasmus MC, The Netherlands/	10.50am	Shifting the Diagnostic Paradigm from Pathogen to Host Ann Falsey /University of Rochester, USA/	10.50am	Impact on Cardiovascular Outcomes Jeff Kwong /ICES, Canada/	
11.10am	Implications of Incomplete Viral Genomes for Influenza A Virus Fitness Anice Lowen /Emory, USA/	11.10am	Innovation in Pandemic Influenza Response Rick Bright /U.S. Department of Health and Human Services, USA/	11.10am	Variations in seasonal influenza vaccine effectiveness due to biological characteristics: A systematic review and META- analysis of test-negative design studies (Abstract No 10311) George Okoli /University of Manitoba, Canada/	
11.30am	Autophagy-mediated restriction of avian influenza virus replication in mammalian cells (Abstract No 10440) Siwen Liu /The University of Hong Kong, Hong Kong/	11.30am	The impact of syndromic molecular point-of-care testing for respiratory viruses in adults presenting to hospital with exacerbation of airways disease: Further analysis form a randomised controlled trial (Abstract No 10563) Nathan Brendish /University Hospital Southampton NHS Foundation Trust, UK/	11.22am	Vaccine effectiveness against influenza hospitalization in the 2018- 2019 season: comparison between cell-based and egg-based influenza vaccines (Abstract No 10395) Hung Fu Tseng /Kasier Permanente Southern California, USA/	
11.42am	Haemagglutinin mutation and higher neuraminidase activity enhanced the adaption of H5N6 avian influenza viruses to mammalian hosts (Abstract No 10855) Honglei Sun /China Agricultural University, China/	11.42am	Evaluation of the Febridx host response point-of-care test to differentiate viral from bacterial aetiology in adults hospitalised with acute respiratory illness during Influenza season (Abstract No 10565)	11.34am	Influenza vaccine effectiveness against laboratory-confirmed influenza mortality in older adults (Abstract No 10881) Jeff Kwong /ICES, Canada/	
11.54am	Assessment of zoonotic transmission of swine influenza A viruses from pigs to naïve or vaccinated ferrets (Abstract No 10945) Ian Brown /Animal and Plant Health Agency, UK/		Nathan Brendish /University Hospital Southampton NHS Foundation Trust, UK/	11.46am	Relative vaccine effectiveness of high dose versus adjuvanted influenza vaccine: A retrospective cohort study (Abstract No 10499) Robertus van Aalst /Sanofi Pasteur, USA/	
12.00pm			Lunch / Exhibition Hall 405EX /			
12.00pm	Sponsored Lunch Symposium (Sanofi Pasteur) / Level 4, Hall 406CX / Beyond Acute Respiratory Disease: How to Demonstrate the Full Public Health Impact of Influenza and its Prevention					
1.30pm	ISIRV Annual General Meeting / Level 4, Hall 406D /

KEYNOTE & PLENARY SPEAKERS

Director

Sylvie Claire BRIAND

World Health Organization, Switzerland

Dr Briand, Director of the Infectious Hazards Management department (IHM) in the Health Emergencies Programme at the World Health Organization's (WHO) headquarters in Geneva, Switzerland. IHM develops global strategies to prevent and control epidemic-prone diseases under the International Health Regulations through global partnerships with a variety of research, strategic, financial and operational partners. IHM portfolio includes epidemic diseases such as cholera, yellow fever, meningitis, seasonal and pandemic influenza, Zika, MERs CoV, plague, smallpox and Ebola, as well as emerging infectious diseases.

2013 AN

Barney S GRAHAM Deputy Director

National Institute of Allergy and Infectious Diseases, USA

Dr. Graham is Deputy Director of NIAID Vaccine Research Center and Chief, Viral Pathogenesis Laboratory. Undergraduate at Rice University, MD from University of Kansas School of Medicine, PhD in Microbiology & Immunology, Internal Medicine residency, chief residencies, and fellowship in Infectious Diseases from Vanderbilt University School of Medicine. He directs basic laboratory research on structural basis for antibody-mediated viral neutralization and basic mechanisms of T cell function and regulation. He also provides oversight for advanced development of candidate VRC vaccines and designs novel vaccine approaches for respiratory virus infections and emerging viral diseases including RSV, influenza, MERS, Nipah, and Zika.

Frederick Glen HAYDEN Professor Emeritus

University of Virginia School of Medicine, USA

Dr. Hayden is Stuart S. Richardson Professor Emeritus of Clinical Virology and Professor Emeritus of Medicine at the University of Virginia School of Medicine, Charlottesville, Virginia. He joined the faculty of the University of Virginia in 1978, became Richardson Professor in 1990, and transitioned to emeritus status in 2015. During 2006-2008 he served as medical officer in the Global Influenza Programme at the World Health Organization, Geneva and during 2008-2012 as influenza research coordinator at the Wellcome Trust, London. His principle research interests have focused on the development of antiviral agents for influenza and other respiratory viral infections. He has published over 400 peer-reviewed articles, chapters, and reviews, and co-edits the textbook Clinical Virology published by ASM Press.

Yoshihiro KAWAOKA Professor

University of Wisconsin-Madison, USA University of Tokyo, Japan

Dr. Yoshihiro Kawaoka was educated in Japan, receiving his DVM in 1978 and his PhD in 1983 from Hokkaido University. Dr. Kawaoka established the technique of reverse genetics, which allows the generation of 'designer' influenza viruses. This technology – coupled with his findings regarding the weakening of deadly influenza viruses – has been used to develop candidate bird flu virus vaccines. Dr. Kawaoka discovered what makes bird flu viruses so deadly and what makes bird flu jump from birds to humans. In recognition of his achievements, Dr. Kawaoka was awarded the Robert Koch Award in 2006; he received the Japan Academy Award in 2016 from the Emperor of Japan. In 2013, he was elected as a Foreign Associate of the United States National Academy of Sciences. In 2015, he received the UNESCO Carlos J. Finlay Prize for Microbiology.

Gabriel Matthew LEUNG

The University of Hong Kong, Hong Kong

Gabriel Leung is the fortieth Dean of Medicine (2013-), inaugural Helen and Francis Zimmer Professor in Population Health and holds the Chair of Public Health Medicine at the University of Hong Kong (HKU). He was Hong Kong's first Under Secretary for Food and Health (2008-11) and fifth Director of the Chief Executive's Office (2011-2) in government.

Leung is one of Asia's leading epidemiologists and global health exponents, having authored more than 450 scholarly papers with an h-index of 60 (Scopus). He is an elected member of the US National Academy of Medicine (NAM).

He was inaugural Chair (2010-4) of the Asia Pacific Observatory on Health Systems and Policies and continues to chair its Strategic and Technical Advisory Committee (2018-). Leung regularly advises national and international agencies including the World Health Organization, World Bank, Asian Development Bank, Boao Forum for Asia, Institut Pasteur, Japan Center for International Exchange and China Centers for Disease Control and Prevention. He is an Adjunct Professor of Peking Union Medical College and Adjunct Professorial Researcher of the China National Health Development Research Center.

Arnold S MONTO Professor

University of Michigan School of Public Health, USA

Arnold S. Monto, MD is the Thomas Francis Jr. Professor at the University of Michigan School of Public Health. The focus of his work has been the epidemiology, prevention and treatment of acute infections in the individual and the community. He led the studies of respiratory infection in Tecumseh, MI, a landmark study of infection in the community, and is now updating these observations in Michigan households with children. Dr. Monto is has been involved in assessing the efficacy of various types of influenza vaccines in prophylaxis and antivirals in prophylaxis and therapy of influenza. He now heads observational studies of effectiveness of influenza vaccines in various settings. He is a past president of the American Epidemiological Society, the 2009 recipient of the Alexander Fleming Award of the Infectious Diseases Society of America for lifetime achievement and the 2012 recipient of the Charles Merieux award of the National Foundation for Infectious Diseases

KEYNOTE & PLENARY SPEAKERS

Malik PEIRIS

Professor Chair of Virology The University of Hong Kong, Hong Kong

Professor Malik Peiris is a clinical and public health virologist with a particular interest in emerging virus disease using a "One Health" approach. His research encompasses the pathogenesis, transmission and ecology of human and animal influenza viruses. He provided understanding on the emergence and pathogenesis of the 2009 pandemic H1N1 virus and on avian influenza viruses H5N1, H9N2 and H7N9 and provided evidence-based options for control of avian viruses in poultry. In 2003, he discovered a novel coronavirus was the cause of SARS. Currently he is researching the recently emerged MERS coronavirus.

Kanta SUBBARAO Director

Peter Doherty Institute for Infection and Immunity, Australia

Dr. Kanta Subbarao is the Director of the WHO Collaborating Centre for Reference and Research on Influenza and Professor, Department of Microbiology and Immunology, The University of Melbourne at The Peter Doherty Institute for Infection and Immunity. She is a virologist and a physician with specialty training in paediatrics and paediatric infectious diseases. Her current research efforts are directed at understanding the biology and immune responses to influenza viruses and vaccines. She is a Fellow of the American Academy of Microbiology and the Infectious Diseases Society of America. She serves on the Editorial Board of PLoS Pathogens and mBio.

Daniel Bruce JERNIGAN Director

U.S. Centers for Disease Control and Prevention, USA

Daniel B. Jernigan, MD MPH is the Director of the Influenza Division in the National Center for Immunization and Respiratory Diseases at CDC where he is responsible for oversight and direction of over 300 staff executing a broad scientific program to improve the detection, prevention, treatment, and response to seasonal, novel, and pandemic influenza. The Influenza Division is responsible for national and global surveillance of influenza, serves as a World Health Organization Collaborating Center for the Surveillance, Epidemiology and Control of Influenza, and provides ongoing risk assessment of emerging influenza viruses to inform domestic and international responses.

Ann MOEN Chief

World Health Organization, Switzerland

Ann Moen is Chief, Influenza Preparedness and Response at WHO. For 18 years she worked at US CDC to develop the Influenza Division's international capacity building program to support capacity for laboratory, surveillance and response in more than 50 countries. Prior experience includes working with Community and Migrant Health Centers in the US for the delivery of healthcare to the underserved and as a microbiologist at CDC in the BSL4 laboratory on Ebola, Lassa and other hemorrhagic fever pathogens. Her career started as a Peace Corps volunteer in rural Thailand at a District Hospital on laboratory diagnostics and quality control.

Michael RYAN

Executive Director World Health Organization, Switzerland

Dr Mike Ryan has been at the forefront of managing acute risks to global health for nearly 25 years. He served as Assistant Director-General for Emergency Preparedness and Response in WHO's Health Emergencies Programme from 2017 to 2019.

Dr Ryan first joined WHO in 1996, with the newly established unit to respond to emerging and epidemic disease threats. He has worked in conflict affected countries and led many responses to high impact epidemics. He is a founding member of the Global Outbreak Alert and Response Network (GOARN), which has aided the response to hundreds of disease outbreaks around the world. He served as Coordinator of Epidemic Response (2000-2003), Operational Coordinator of WHO's response to the SARS outbreak (2003), and as WHO's Director of Global Alert and Response (2005-2011)

He was a Senior Advisor on Polio Eradication for the Global Polio Eradication Initiative from 2013 to 2017, deploying to countries in the Middle East.

He completed medical training at the National University of Ireland, Galway, a Master's in Public Health at University College Dublin, and specialist training in communicable disease control at the Health Protection Agency in London and the European Programme for Intervention Epidemiology Training.

Katelijn VANDEMAELE

World Health Organization, Switzerland

Dr Katelijn Vandemaele started her career as a General Practitioner in Belgium. She picked up interest for public health during the post-graduate courses in tropical medicine (Antwerp). In 1996 she joined the then newly created division of Emerging and Other communicable diseases (EMC) in WHO, Geneva led by Dr David Heymann. She worked for two years in Public Health in the Oxford Region (UK) and obtained a masters in public health at the University of Birmingham (UK). Since 2000, she has been working in several departments in WHO Geneva on emerging and re-emerging diseases, and involved in outbreaks of SARS, H5N1, H7N9, the pandemic 2009 and MERS CoV. In the past ten years, she has been focusing on epidemiology and surveillance of seasonal, zoonotic and pandemic influenza.

KEYNOTE & PLENARY SPEAKERS

Wenqing ZHANG Head

World Health Organization, Switzerland

Heading the Global Influenza Programme of WHO in its headquarters in Geneva Switzerland since November 2012, Dr Zhang provides leadership and coordinates global activities on influenza surveillance, virus monitoring, detection of emerging novel viruses, risk assessment and evidence for policies, vaccine virus and pandemic preparedness including pandemic influenza vaccine response. From 2002 to 2012, Dr Zhang coordinated the WHO Global Influenza Surveillance and Response System (GISRS), building and functioning the global system of surveillance, preparedness and response. In response to 2009 A(H1N1) influenza pandemic, Dr Zhang directed the Laboratory Response and Capacity of WHO response. Before joining WHO, Dr Zhang worked for 9 years in the Chinese Academy of Preventive Medicine, Ministry of Health on tuberculosis, schistosomiasis and iodine deficiency disorder initiatives in collaboration with WHO, World Bank, UNICEF and UNIDO. MD by education with postgraduate training on system evaluation and epidemiology and a bachelor degree on biomedical engineering.

SPONSORED LUNCH SYMPOSIUM

Sanofi Pasteur Lunch Symposium

Date : Thursday, 29 August 2019

- Time : 12:00pm 1:30pm
- Venue : Hall 406CX, Level 4
- Title : Beyond Acute Respiratory Disease: How to Demonstrate the Full Public Health Impact of Influenza and its Prevention

Chair : Robert Booy

/Senior Professorial Fellow at Australia's National Centre for Immunisation Research and Surveillance; Professor, The University of Sydney, Australia/

AGENDA

12:00pm 12:15pm 12:15pm Changing the paradigm: the domino effect of influenza - beyond the respiratory disease Robert Booy /Senior Professorial Fellow at Australia's National Centre for Immunisation Research and Surveillance; Professor, The University of Sydney, Australia/ Cardiovascular complications of influenza Charlotte Warren Gash /Assoc. Prof., London School of Hygiene & Tropical Medicine, UK/ Evaluating the impact of influenza vaccines on cardiovascular outcomes - an industry perspective Rosalind Hollingsworth /Global Medical Expert Lead, Influenza, Sanofi Pasteur, Swiftwater, USA/

SPONSORED EVENING SYMPOSIUM

Hoffmann La-Roche Evening Symposium

- Date : Thursday, 29 August 2019
- Time : 6:00pm 7:30pm
- Venue : Hall 406CX, Level 4
- Title: Can we stop flu going viral?
- Chair : Arnold Monto /University of Michigan, USA/

AGENDA

6:00pm	Tea Reception
6:30pm	Chair's welcome and introduction Arnold Monto /University of Michigan, USA/
	Influenza transmission: insights from the primary care perspective Hoe Nam Leong /Rophi Clinic, Mt Elizabeth Novena Hospital, Singapore/
	Transmission in animal models: what have we learned from the ferret? Wendy Barclay /Imperial College, London, UK/
	Transmission in humans: learnings and limitations Aeron Hurt /University of Melbourne, Australia/ Roche Basel, Switzerland/
	Panel discussion and Q&A Close Arnold Monto /University of Michigan, USA/

SPONSORED LUNCH SYMPOSIUM

Seqirus Lunch Symposium

- Date : Friday, 30 August 2019 Time : 12:30pm - 2:00pm Venue : Hall 406CX, Level 4
- Title : Raising Defenses: Strengthening Influenza Protection

AGENDA

-	
12:30pm	Lunch Distribution
12:45pm	Identifying the threats: Evaluating the unmet needs in influenza vaccination John S. Tam /Hong Kong/
12:50pm	Protecting against an elusive enemy: The challenge of strain mismatch and egg mutagenesis Catherine Moore /United Kingdom/
1:05pm	Shielding the vulnerable: Improving effectiveness through adjuvanted vaccines Terry Nolan /Australia/
1:20pm	Defending against the threat of a pandemic: How prepared are we? Andrew Pavia /United States/
1:35pm	Close John S. Tam /Hong Kong/

SPONSORED LUNCH SYMPOSIUM

GSK Lunch Symposium

- Date : Saturday, 31 August 2019
- Time : 12:30pm 2:00pm
- Venue : Hall 406CX, Level 4
- Title : Prevention of Paediatric Influenza: Why and How?
- Chair : Ab Osterhaus

/Professor and Founding Director of the Research Center for Emerging Infections and Zoonoses University of Veterinary Medicine, Hannover, Germany/

AGENDA

12:30pm	Lunch Distribution
12:45pm	Welcome and Introduction Ab Osterhaus /Professor and Founding Director of the Research Center for Emerging Infections and Zoonoses University of Veterinary Medicine, Hannover, Germany/
12:50pm	Burden of paediatric influenza Robert Booy /Infectious Diseases Paediatrician & Immunisation expert National Centre for Immuni- sation Research and Surveillance (NCIRS), Sydney/
1:05pm	Efficacy and safety of an inactivated influenza vaccine in the paediatric population Halima Tahrat /Senior Medical Manager Influenza Vaccines, GSK Vaccines, USA/
1:15pm	Paediatric influenza vaccination: recommendations and implementation Ab Osterhaus /Professor and Founding Director of the Research Center for Emerging Infections and Zoonoses University of Veterinary Medicine, Hannover, Germany/
1:30pm	Discussion and Q&A

GSK invites you to a Satellite Symposium:

Prevention of paediatric influenza: why and how?

Chair

Expert Panel

Prof Albert Osterhaus

Prof Robert Booy

Dr Halima Tahrat

Prof Albert Osterhaus

Saturday 31st August 2019 12:45 – 13:45 Level 4 Suntec-Room 406 CX Options X, Singapore

Agenda

Welcome and introduction

- Burden of paediatric influenza
- Efficacy and safety of an inactivated influenza vaccine in the paediatric population
- Paediatric influenza vaccination: recommendations and implementation
- **Discussion and Q&A**

Fluarix Tetra- Southern Hemisphere 2019 Season Singapore Abbreviated Prescribing Information

ACTIVE INGREDIENT: Fluar: Tetra is an inactivated influenza vaccine (split viron), containing antigens (propagated in embryonated eggs) equivalent to the following types and subtypes: A/Michigan/45/2015 (H1N1)pdm09-like strain (A/Bingapore/GP1908/2015 [NFN-180); A/Switzerland/8060/2017 (H3N2)-like strain (A/Binsbane/1/2018,NYMC X-311); B/Colorado/06/2017-like (B/Mayland/15/2016, NYMC BX-69A); and B/Phuket/3073/2013-like virus (B/Phuket/3073/2013, wild type). Each 0.5 ml vaccine dose contains 15 gp haemagglutinin of each of the recommended strains. This vaccine complexe with the World Health Organization (WHO) recommendation (Southern Hemisphere) for the 2019 season. Each 0.5 ml vaccine dose contains 15 gp haemagglutinin of each of the recommended strains. Fluarix Tetra way contain traces of Formaldelyde, Sodium Deoxycholate, Ovallumin, Gentamicin sulphate and Hydrocortisone. The maximum amount of Ovalbumin that may be present is not more than 0.05 micrograms per dose. INDICATIONS: For active immunization of adults and children from 6 months of age of the prevention of influenza. Diseased by the two subtypes and the two influenza 8 virus subtypes contained in the vaccine. The use of Fluarix Tetra should be based on official recommendations. DOSAGE AND DMINISTRATION: Adults and Children from 6 months any subtraces or to any of the excipients or to any component that may be present as traces such as eggs (valbumin, chicken proteins) formaldehyde, gentamicin sulphate and sodium deoxycholate. Immunization should be postponed in patients with febrie ilness or acute infection. WARNINGS AND PRECAUTIONS: It is good clinical practice to precede vaccination by a revive of the medical history (sepecially with febrie ilness or acute infection against those strains of virus from which the vaccine is prepared and to closely related strains. As with all vaccines appropriate medical history (sepecially with febrie ilness) and a clinical examination. As with all injectable vaccines, appropriate medical history (sepecially minumo

11184	Xiu-Feng (Henry) Wan	Session 3: Surveillance & Forecasting	Globalization Complicated Emergence And Spread Of H3N2 Seasonal Influenza A Viruses			

Date: 30 August 2019, Friday

Abstract ID	Name	Presentation Session	Abstract Title
			Time: 10.30am - 12.30pm
		Clinical Science	es: Clinical Trials - Treatment and Prevention
11127	Yu-Hsiang Hsieh	Session 4 : Clinical IV	Intravenous Peramivir In Emergency Department High-Risk Patients With Influenza: A Multicenter Randomized Controlled Study
11217	Dennis Kai Ming Ip	Session 4 : Clinical IV	A Randomized Controlled Trial On The Effect Of Fever Suppression By Antipyretics On Influenza
		Clinica	Sciences: Therapeutics – Antivirals
10475	Emi Takashita	Session 4 : Clinical IV	Human-To-Human Transmission Of Influenza A(H3N2) Viruses Exhibiting Reduced Susceptibility To Baloxavir Due To A PA I38T Substitution In Japan
11025	Sam Lee	Session 4 : Clinical IV	Development Of A New Class Of Broad Spectrum Influenza PB2 Inhibitors
11286	Yeming Wang	Session 4 : Clinical IV	Pharmacokinetics Of Favipiravir (T-705) In Combination With Oseltamivir For Treatment Of Critically ill Patients With Severe Influenza
		Virology and I	Pathogenesis: NextGen/Universal Vaccines
10535	Daniel Stadlbauer	Session 4: NextGen/ Universal Vaccines	A Human Broadly Cross-Reactive Anti-Neuraminidase Antibody Protects Against Different Subtypes Of Influenza A And B Viruses In The Mouse Model
10880	Jae-Keun Park	Session 4: NextGen/ Universal Vaccines	Pre-Existing Immunity To The Conserved Hemagglutinin Stalk Of Influenza Virus May Drive Selection For An Escape Mutant Virus In Humans

ORAL PRESENTATION LISTINGS Date: 30 August 2019, Friday

11

Abstract ID	Name	Presentation Session	Abstract Title
			Time: 10.30am - 12.30pm
		Virology and I	Pathogenesis: NextGen/Universal Vaccines
10980	Lidia Oostvogels	Session 4: NextGen/ Universal Vaccines	RNACTIVE©: A Promising mRNA Based Influenza Vaccine
11110	Joseph Eiden	Session 4: NextGen/ Universal Vaccines	Intranasal M2SR (M2-Deficient Single Replication) Influenza Vaccine Induced Protection Against Challenge With A Substantially Drifted H3N2 Virus In A Phase 2 Study
11170	Adam Wheatley	Session 4: NextGen/ Universal Vaccines	Characterising Human Memory B Cells With Cross-Lineage Recognition Of The Influenza B Hemagglutinin Following Seasonal Immunisation
11735	Florian Krammer	Session 4: NextGen/ Universal Vaccines	Immunogenicity Of Chimeric Hemagglutinin-Based Universal Influenza Virus Vaccine Candidates: Interim Results Of A Randomized, Placebo-Controlled, Phase 1 Clinical Trial
	1	Publi	c Health: Pandemic Preparedness
10375	Min Levine	Session 4: Optimising Vaccine Strategies (I)	Heterologous Prime-Boost Using AS03 Adjuvanted A(H5N1) Pandemic Stockpiled Influenza Vaccines Induces Broader Cross-Clade Antibody Responses Than Homologous Prime-Boost
		Public I	Health: Vaccine Effectiveness/Impact
10385	Joshua Adam Mott	Session 4: Optimising Vaccine Strategies (I)	Comparison Of Influenza Antibody Titers Among Women Who Were Vaccinated In The 2nd And 3rd Trimesters Of Pregnancies
10390	Huong Mclean	Session 4: Optimising Vaccine Strategies (I)	Serologic Response To Sequential Influenza Vaccination In Older Adults From A Randomized Trial
10561	Surender Khurana	Session 4: Optimising Vaccine Strategies (I)	Repeat Vaccination Reduces Antibody Affinity Maturation Irrespective Of Influenza Vaccine Platform In Humans
10609	Huong Mclean	Session 4: Optimising Vaccine Strategies (I)	Does Strain Change Influence Vaccine Effectiveness Against Influenza A(H3N2)?
11171	Maria Auladell	Session 4: Optimising Vaccine Strategies (I)	Prior Infection Enhances The Magnitude And Breadth Of Anti-H3N2 Antibody Responses To Influenza Vaccination And Reduces The Risk Of Subsequent A/H3N2 Virus Infection
			Time: 2.00pm - 4.00pm
		Virology and P	athogenesis: Immune Response to Infection
10471	Carolien Van De Sandt	Session 5: Immune Response to Infection	Molecular And Functional Dissection Of The Influenza Virus-Specific CD8+ T-Cell Receptor Repertoire During Aging
10490	Hang Xie	Session 5: Immune Response to Infection	Broadened Cross-Reactive Immunity In Ferrets After Repeated Influenza A/H3 Exposures
10528	Julius Wong	Session 5: Immune Response to Infection	Annotation And Recovery Of Ferret-Specific Immunoglobulin Sequences
11035	Suzanna Paterson	Session 5: Immune Response to Infection	Innate-Like Signatures Of Influenza-Specific CD8+ Resident Memory T Cell Responses In The Human Lung
11216	Hyon-Xhi Tan	Session 5: Immune Response to Infection	Subdominance And Diminished TFH Elicitation Constrain Humoral Immunity Against The Influenza Ha-Stem

The

ORAL PRESENTATION LISTINGS

Date: 31 August 2019, Saturday

Abstract ID	Name	Presentation Session	Abstract Title		
	Time: 10.30am - 12.30pm				
		Clinica	I Sciences: Therapeutics – Antivirals		
11211	Josef Järhult	Session 7: Influenza in the Tropics	Resistance Development In Influenza A Viruses Infecting Mallards Exposed To Low Levels Of Peramivir		
			Time: 2.00pm - 3.30pm		
		Clinical Sci	ences: Diagnostics and Disease Markers		
10943	Delphine Guyon-Gellin	Session 8: Controlled Human Infection Model (CHIM) Challenge Studies	Pre-Existing Np Specific T-Cell Response Correlates With Reduction Of Symptoms In A Human Influenza Challenge Model		
		Clinical Sciences: C	Ilinical Trials – Study Designs, Clinical Endpoints		
11082	Armen Donabedian	Session 8: Controlled Human Infection Model (CHIM) Challenge Studies	Correlates Of Protection For Better, Faster Influenza Vaccine Development		
		Virology	y and Pathogenesis: Viral Replication		
10606	David Bacsik	Session 8: Viral Replication	New Genomic Approaches To Understand The Heterogeneity Of Viral Replication In Single Cells		
10843	Thomas Peacock	Session 8: Viral Replication	ANP32 Proteins From Different Mammalian Species Act As Host Range Barriers And Shape Influenza Polymerase Adaptation.		
			Time: 4.00pm - 5.30pm		
	Clini	cal Sciences: Therap	peutics – Immunomodulators, Supportive Care, Others		
11151	Resti Yudhawati Meliana	Session 9 : Critical influenza illness	Potential Therapeutic Role Of Bone Marrow-Derived Mesenchymal Stem Cells In Acute Lung Injury Induced By Highly Pathogenic Avian Influenza Virus A/ H5N1		
		Clinica	I Sciences: Therapeutics – Antivirals		
11309	Mirella Salvatore	Session 9 : Critical influenza illness	Baloxavir For The Treatment Of Influenza Virus Infection In Hematopoietic Stem Cell Transplant Recipients Who Failed Oseltamivir		
		Public	Health: Disease Burden & Severity		
10362	Mark Thompson	Session 9: Disease Burden, Impact, and Severity	Under-Detection Of Laboratory-Confirmed Influenza-Associated Hospitalizations Among Infants In A Multi-Country Prospective Study		
10667	Cheryl Cohen	Session 9: Disease Burden, Impact, and Severity	Community Burden Of Influenza In A Rural And An Urban Setting, South Africa, 2016-2017		
10858	Melissa Rolfes	Session 9: Disease Burden, Impact, and Severity	Estimating The Number Of Deaths Due To Influenza — An Alternative To Regression-Based Estimates Of Excess Influenza Mortality		
11044	Shikha Garg	Session 9: Disease Burden, Impact, and Severity	The Burden Of In-Hospital And Out-Of-Hospital Deaths Among Patients Hospitalized With Influenza, Flusurv-Net, 2010–2016		

ORAL PRESENTATION LISTINGS Date: 31 August 2019, Saturday

Abstract ID	Name	Presentation Session	Abstract Title
			Time: 4.00pm - 5.30pm
		Virology and Patho	ogenesis: Influenza Evolution & Human Ecology
10822	Adam Lauring	Session 9: Influenza Evolution & Human Ecology	The Evolutionary Dynamics Of Influenza A And Influenza B Viruses In Naturally Infected Human Hosts
10995	Rubaiyea Farrukee	Session 9: Influenza Evolution & Human Ecology	Predicting Evolutionary Pathways To 'Fit' Oseltamivir Resistant Influenza Viruses

Date: 1 September 2019, Sunday

Abstract ID	Name	Presentation Session	Abstract Title
			Time: 8.30am - 10.30am
		Public H	lealth: Epidemiology & Transmission
11088	Anna Session 10: Hayman Imprinting, Sero- epidemiology, Age Profile Differences		Effect Of Maternal Pandemic Vaccination On Seroprevalence Against Influenza In Children At Birth And At 4 Years
	1	Public Hea	alth: Human Sero-Epidemiology Studies
11051	Sook-San Wong	Session 10: Imprinting, Sero- epidemiology, Age Profile Differences	Hemagglutinin And Neuraminidase Antibodies Are Induced In An Age- And Subtype- Dependent Manner After Influenza Virus Infection.
11162	Vivian Leung	Session 10: Imprinting, Sero- epidemiology, Age Profile Differences	Antibody Response And Influenza-Like Illness Among Healthcare Workers After Influenza Vaccination
11206	Steven Riley	Session 10: Imprinting, Sero- epidemiology, Age Profile Differences	Serosolver: An Open Source Tool To Infer Epidemiological And Immunological Dynamics From Serological Data
11349	Sue Huang	Session 10: Imprinting, Sero- epidemiology, Age Profile Differences	Risk Factors And Attack Rates Of Seasonal Influenza Infection: Results Of The SHIVERS Seroepidemiologic Cohort Study
		Clinical Science	es: Clinical Trials - Treatment and Prevention
11718	Hideyuki Ikematsu	Session 10: Non Pharmaceutical Interventions	Single-Dose Baloxavir For The Prevention Of Influenza Among Household Contacts: A Randomized, Double-Blinded, Placebo Controlled Post-Exposure Prophylaxis Study (Blockstone)
11756	Jeffrey Baker	Session 10: Non Pharmaceutical Interventions	Single-Dose Baloxavir Is Well Tolerated And Effective For Treatment Of Influenza In Otherwise Healthy Children Aged 1 To < 12 Years: A Randomized, Double-Blinded, Active-Controlled Study (Ministone-2)
		Clinica	Sciences: Therapeutics – Antivirals
10812	Takeki Uehara	Session 10: Non Pharmaceutical Interventions	Reduced Susceptibility Viruses To Baloxavir Marboxil: Prognosis Factors Of The Emergence And Impact On Clinical And Virologic Outcomes In Pediatric Patients In Japan
11754	David Oldach	Session 10: Non Pharmaceutical Interventions	A Global, Randomised, Double-Blind, Placebo-Controlled Study Evaluating Safety And Efficacy Of Vis410 In Combination With Oseltamivir Versus Oseltamivir Alone In Hospitalized Adults With Influenza A Requiring Oxygen

The

Date: 1 September 2019, Sunday

SPONSOR AND EXHIBITOR LISTINGS

F.HOFFMANN LA-ROCHE Booth: C5 Website: www.roche.com

Roche is a global pioneer in pharmaceuticals and diagnostics focused on advancing science to improve people's lives. The combined strengths of pharmaceuticals and diagnostics under one roof have made Roche the leader in

personalised healthcare – a strategy that aims to fit the right treatment to each patient in the best way possible. Roche is the world's largest biotech company, with truly differentiated medicines in oncology, immunology, infectious

diseases, ophthalmology and diseases of the central nervous system. Roche is also the world leader in in vitro diagnostics and tissue-based cancer diagnostics, and a frontrunner in diabetes management.

Founded in 1896, Roche continues to search for better ways to prevent, diagnose and treat diseases and make a sustainable contribution to society. The company also aims to improve patient access to medical innovations by working with all relevant stakeholders. Thirty medicines developed by Roche are included in the World Health Organization Model Lists of Essential Medicines, among them life-saving antibiotics, antimalarials and cancer medicines. Roche has been recognised as the Group Leader in sustainability within the Pharmaceuticals, Biotechnology & Life Sciences Industry nine years in a row by the Dow Jones Sustainability Indices (DJSI).

The Roche Group, headquartered in Basel, Switzerland, is active in over 100 countries and in 2017 employed about 94,000 people worldwide. In 2017, Roche invested CHF 10.4 billion in R&D and posted sales of CHF 53.3 billion. Genentech, in the United States, is a wholly owned member of the Roche Group. Roche is the majority shareholder in Chugai Pharmaceutical, Japan. All trademarks used or mentioned in this release are protected by law.

SANOFI PASTEUR Booth: B5 Website: www.sanofipasteur.com/en/

For over a century, Sanofi Pasteur has been committed to protect life through vaccination. We believe in a world where no one suffers or dies from a vaccine-preventable disease. Our vaccines help protect as many as half a billion lives every year against life-threatening infectious diseases at every stage of life. With our 15,000 employees worldwide, we seek to extend the protective power of vaccination to new infectious diseases while continuously improving existing vaccines to enhance health and well-being.

Sanofi Pasteur is the world's largest manufacturer of influenza vaccines. In 2018, we completed a production of around 200 million doses of seasonal influenza vaccine, for both Southern and Northern hemispheres, i.e. approximately 40% of influenza vaccines distributed worldwide. Sanofi Pasteur produces vaccines against seasonal influenza on five sites: Swiftwater (Pennsylvania, USA), Pearl River (Connecticut, USA), Val de Reuil (France), Ocoyoacac (Mexico) and Shenzhen (China).

SEQIRUS Booth: A5 Website: www.seqirus.com www.csl.com

Seqirus has public health protection at its core, which reflects the promise of our parent company CSL Limited (ASX:CSL), founded in 1916 to save lives and protect the health of people. Our first true test came with the Spanish Influenza Pandemic in 1918 and we have been committed to the fight against influenza ever since. As one of the largest influenza vaccine providers in the world, Seqirus is a major contributor to the prevention of influenza globally and a transcontinental partner in pandemic preparedness. Seqirus operates state-of-the-art production facilities in the U.S., the UK and Australia, manufactures influenza vaccines using both egg-based and cell-based technologies and has a globally integrated supply chain. It has a rich R&D pipeline, a broad portfolio of differentiated products and a commercial presence in more than 20 countries.

GSK Website: www.gsk.com

PLATINUM SUPPORTER

GSK - a science-led global healthcare company with a special purpose: to help people do more, feel better, live longer.

GSK is the world's leading vaccine company, with a portfolio that helps protect people throughout life and an innovative pipeline of 16 vaccines in development. Our vaccines help prevent illnesses such as hepatitis A and B, diphtheria, tetanus, whooping cough, measles, mumps, rubella, polio, pneumococcal disease, influenza, shingles and meningitis. At GSK, more than 17,000 people worldwide deliver around two million vaccines per day to people in 158 countries.

PLATINUM SUPPORTER

PLATINUM SUPPORTER

SPONSOR AND EXHIBITOR LISTINGS

JANSSEN PHARMACEUTICALS Website: www.janssen.com

At the Janssen Pharmaceutical Companies of Johnson & Johnson, we are working to create a world without disease. Transforming lives by finding new and better ways to prevent, intercept, treat and cure disease inspires us. We bring together the best minds and pursue the most promising science.

We are Janssen. We collaborate with the world for the health of everyone in it.

From viral hepatitis and human immunodeficiency virus (HIV) to respiratory syncytial virus (RSV) and influenza, the teams of people working in Infectious Diseases & Vaccines at Janssen have one mission. They work every day with the goal to discover and develop novel therapeutics and vaccines to prevent, treat and cure infectious diseases worldwide.

SABIN VACCINE INSTITUTE: The Influenzer Initiative Booth: B1 Website: www.sabin.org

The Influenzer Initiative is building a movement to accelerate development of a universal influenza vaccine. The Initiative is a program of the Sabin Vaccine Institute, a non-profit seeking a future free from vaccine-preventable diseases. We believe in the power of vaccines to change the world.

VIROCLINICS BIOSCIENCES Booth: B4

Website: www.viroclinics.com

BRONZE SUPPORTER

BRONZE SUPPORTER

BRONZE SUPPORTER

211 SAR

Viroclinics operates at a global level, being the preferred virology testing laboratory for several of the top-10 Biopharmaceutical companies. As a virology contract research organization, we serve the biopharmaceutical community with our preclinical, clinical diagnostic, research & development and clinical trial logistics services.

OTHER EXHIBITORS

APACI Booth: B3 Website: www.apaci.asia

APACI - Asia Pacific Alliance for the Control of Influenza: Reducing the burden of influenza in the Asia Pacific Region - by enhancing control measures and boosting pandemic preparedness in the region, through the provision of educational information and activities.

CEIRS Booth: A1 Website: www.niaidceirs.org

The Centers of Excellence for Influenza Research and Surveillance (CEIRS) is an integrated network of centers funded by the National Institute of Allergy and Infectious diseases (NIAID). The CEIRS program was designed to foster innovative and collaborative research on the influenza virus.

ESWI Booth: C1 Website: eswi.org

The European Scientific Working group on Influenza (ESWI) is a network of independent influenza experts and organizations of public health officials, healthcare professionals, at-risk patients and the elderly. Together, we aim to reduce the burden of influenza in Europe.

GISAID Initiative Booth: A4 Website: gisaid.org

GISAID is known for successfully enabling the rapid sharing of influenza virus data through a unique sharing mechanism, recognized for its importance to globalhealthsecurity.GISAID'spublicly-accessibleEpiFlu[™] database, hosted by Germany, provides the most complete collection of genetic sequences of influenza viruses and related clinical and epidemiological data.

hVIVO Services Limited Booth: B2 Website: hvivo.com

Industry-leading clinical development services business supporting product development for antivirals, vaccines and respiratory therapeutics. A pioneer of human disease challenge models in FLU, RSV and HRV having inoculated over 2500 volunteers. hVIVO has expanded the concept into product development for respiratory/airways disease (asthma, COPD, cough) and in wider patient populations.

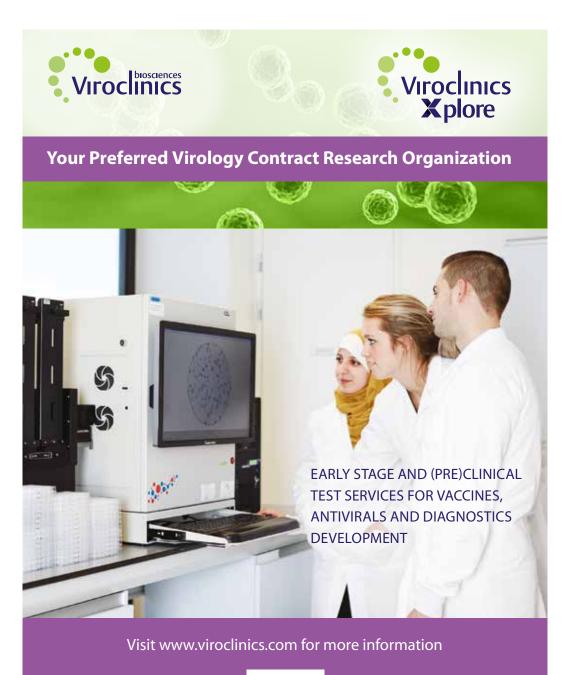

OTHER EXHIBITORS

InDevR Inc Booth: A2 Website: indevr.com

InDevR is a global leader in progressive new analytical technologies that enable accelerated development and manufacturing of vaccines and other biotherapeutics. For more information about the company and products, please visit our website or call +1 303-402-9100.

ISIRV Booth: A3 Website: www.isirv.org

ISIRV, the International Society for Influenza and other Respiratory Virus diseases, is an international, independent scientific professional society promoting the prevention, detection, treatment, and control of influenza and other respiratory virus diseases. It fulfils its mission through the exchange and dissemination of information, facilitating the interaction of scientists and of public health specialists, and the promotion of international collaborative efforts against these diseases. It achieves this mainly through the organisation of scientific meetings, primarily the OPTIONS series.

The

5th INTERNATIONAL SYMPOSIUM ON NEGLECTED INFLUENZA VIRUSES – 11-13 MAY 2020 COLUMBUS, OHIO, USA

Join us in the glorious spring for the next meeting in the NIV group series, to be held in Columbus, Ohio's capital city. Named one of the New York Times top 50 places to visit in 2019, Columbus is one of the nation's fastest growing cities and is home to The Ohio State University. We welcome you to come enjoy all central Ohio has to offer!

Following the success of the 4th NIV symposium in Brighton, UK, last year, this meeting will retain the format and will explore the latest data on surveillance and disease investigation, virus transmission and control, clinical and experimental virology, and emerging issues and new developments related to swine, equine, canine and other non-human/non-avian influenza viruses.

12th INTERNATIONAL RESPIRATORY SYNCYTIAL VIRUS SYMPOSIUM – 9-12 SEPTEMBER 2020 BELFAST, NORTHERN IRELAND

RSV2020 is currently in the planning stage and this time will be hosted at the ICC (the Waterfront) in Belfast, Northern Ireland, an award-winning venue in the heart of the city.

Following RSV2018 held in Asheville, NC, USA, which received excellent feedback, RSV2020 promises to deliver an equally impressive programme of similar format. This is the premier conference for RSV and will be of significant benefit to RSV researchers/scientists and clinicians. You will have a warm welcome in Belfast – see you there!

FOR UPDATES ON ALL ISIRV EVENTS, VISIT OUR WEBSITE www.isirv.org TO JOIN OUR MAILING LIST, WRITE TO contact@isirv.org

International Society for Influenza and other Respiratory Virus Diseases

Supporting you to protect your patients against influenza

We are here to support you in protecting your high-risk patients from the serious impact of influenza. That's why, since launching our first influenza vaccine over fifty years ago,¹ we have provided you with products and services that allow you to inform and vaccinate more patients.

Now, with VaxigripTetra[®], our innovative quadrivalent influenza vaccine, you can give broader protection to your patients.*

- *Compared with trivalent influenza vaccines

Xofluza* (baloxavir marboxil) - Abbreviated Prescribing Information

Before prescribing Xofluza, please consult the full local prescribing information

THERAPEUTIC INDICATIONS: Xofluza is indicated for the treatment of uncomplicated influenza in patients aged 12 and ab symptomatic for no more than 48 hours. POSOLOGY AND METHOD OF ADMINISTRATION: The recommended dose of Xoflu 40 mg in patients with body weight of 40 kg to 480 kg; oral dose of 80 mg in patients with body weight of 580 kg. CONTRAININ is contraindicated in patients with a known hypersensitivity to baloxavir marboxil or any of the excipients. USE IN SPECIAL effects on fertility were observed in animal studies performed with baloxavir marboxil. Xofluza should be avoided during protential benefit justifies the potential risk to the fetus. The safety and efficacy of Xofluza in pediatric patients (<12 years or potential benefit justifies the potential risk to the fetus. The safety and efficacy of Xofluza in pediatric patients (<12 years or potential benefit justifies the potential risk to the fetus. The safety and efficacy of Xofluza in pediatric patients (<12 years or potential benefit justifies the potential risk to the fetus. The safety and efficacy of Xofluza in bediatric patients or how to be avoid the avoid be avoided by the potential risk to the safety and efficacy or batients with rank or bene to bene the potential benefit justifies the potential risk to the fetus. The safety and efficacy or foxifiuza in pediatric patients or power bene relabilized. † UNDESIRABLE FEFECTS adverse reactions have

SAFETY REPORTING FOR POTENTIAL UNDESIRABLE EFFECTS: Please report any adverse events to the local Roche Adverse Event ema at singapore.drugsafety@roche.com or call (65) 6735 0550. This will enable Roche to better understand the safety of Xofluza and to provid nation to Health Authorities. Healthcare Providers and patients.
